DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Chua et al. (U.S. 6,606,235).

As to claims 1-2, Chua et al. disclose in Figures 5-6 a probe card 100 comprising a circuit board 3 for sending and receiving via communication of electrical signals to test operation and a probe needle 15 with one end connected to circuit board 3 (see Fig. 6) and the other end coming into contact with electrodes connected to semiconductor integrated circuit 14 and a circuit for applying voltage to probe needle to destroy via breaking insulating film at the tip of probe needle 15 (see from column 2, line 64 through column 3, line 4).
